

Finding Images for the 3rd Grade Country Projects

1. Go to the MFS Library Homepage, go to the Lower School Library, LS Databases/
2. Go to the **Encyclopedia Britannica**. (To access this subscription database from home, you may need to login to get to the username and password).
3. When the Encyclopeda Britannica opens, type in your country in the “Search all levels” box.
4. Look for the “Multimedia” section in the bottom right column to find images for your report.
5. If you want to look at any of these images on this first page, click on the image. To print an image, select “print page” from the tab found along the top of the page.
6. When you cut out the image for your report, include the caption title.
7. If the image prints out too small for your needs, sometimes there is an option to click on “View full-size image”. Then right click on the image, and click on “print picture.”
8. To browse more images about your country, click on “more multimedia” at the bottom. You can browse through more images by clicking on the next page number or on “next page”.
9. Do not select “video/animation” files for locating images to print out for this report (although you may of course enjoy watching the videos!)
